NAPERVILLE

1943

Recommendations

These ten items were selected from Naperville's Best Seller List. They are the items that have enjoyed greatest popularity with our customers over the past year. You can quickly see why in the pictures. Each is in excellent finish—the shrubs are definitely heavy—the branching of the trees is strong and regular. With very little trimming, they are ready for final installation.

These Are Actual Photos

Each one is pictured just as it grew in our nursery row. All of these pictures were taken in our nursery on Saturday, Sept. 5th, 1942. (With exception of the Magnolia *Soulangeana*, which we wanted to show in bloom, and bought a standard horticultural photo. Our plants are younger and more upright.

Available in Quantity

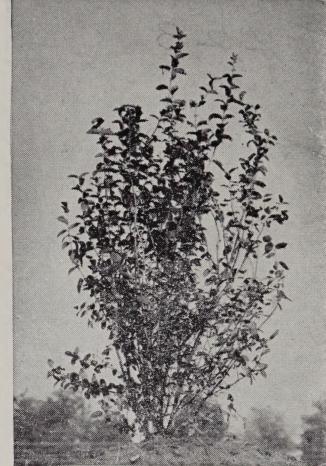

We can duplicate any item pictured here—right from our nursery row. We tried to pick an "average" item for the photos—neither the best, nor the poorest in the row. You can expect plants very similar to our pictures.

6 Times State Inspected

Everything here is at least 3 years old. It has been State Inspected at least 6 times for disease-free growth. That this is good healthy, vigorous stock—well cared for and well grown—we believe is apparent from the pictures.

How Recently Have YOU Visited Our Nursery?

This is an invitation to former customers and to new customers. If you have not seen Naperville Nursery in the past year or two, plan to visit us. Our fields and our stock is in excellent shape—our present low prices will make Naperville FIRST on your buying list for 1943.

Viburnum Americanum

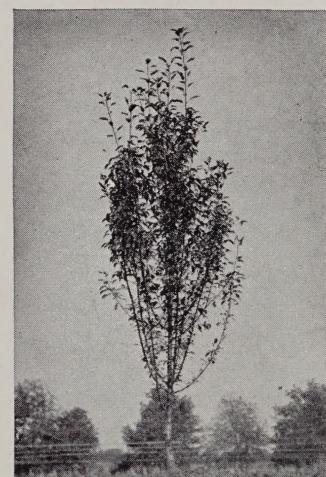

3 to 4 ft. **80c** each rate

Erect and evenly branched heads, filled with live young growth, on good husky canes, show you what Naperville offers at this lower-than-average price. We can promise you equally shapely plants, free of legginess, even in 1,000 lot orders. 3 full years in the nursery row, transplanted and root-pruned, they're really finished. Eleven varieties of Viburnum, equally good, in a full range of sizes, listed on page 15.

Honeysuckle Zabeli

4-5 ft. **70c** each rate

The True-Red Honeysuckle. Performance in our nursery makes us recommend this as the best of all Honeysuckles. Zabeli in bloom looks like the reddest weigela you ever saw—shows more color because leaf is small. Every cane filled with flowers, followed by brilliant red berries. Our block is all 15 to 20 canes. Two smaller sizes, equally low priced, page 10.

Honey Locust

8-10 ft. **\$4.00** each rate

Never a surplus in Naperville's Honey Locusts. This popular tree thrives in Chicago's smoke and gasoline fumes—park boards prefer them because they provide ample shade and growth without robbing the soil of sun and moisture—permit dense lawns right up to trunk. We've given every one plenty of room in the row for best branching; all have been transplanted twice, page 22.

Hopa Crab

8-10 ft. **\$5.00** each rate

This typical tree, selected at random from our Hopa block, shows what Naperville offers in well-balanced, finished specimen stock. Hidden with deep pink flowers in the spring, filled with tiny bright red apples in the fall, it's a source of delight to home owners. Twenty-three more varieties in all sizes on pages 23 and 24.

Euonymus

5-6 ft. **80c** each rate

Americanum. This photo demonstrates why we took our own pictures of our own stock this year. See the heavy "finish"—in strong cane and branch development. In late fall, it fills with brilliant red and pink fruits that often hang on into winter. Called "strawberry tree" although it looks more like a giant flowering almond. More varieties, sizes, page 8.

Dwarf Ninebark

3-4 ft. **70c** each rate

Whether you call for 1 or 1000, we can duplicate the dense, filled specimen pictured above. This entire lot is uniformly tall and wide, as a result of its compact branching on 10 to 15 main canes. Remember, this is just an "average" plant from the nursery row—it shows the heavier grade you can expect at Naperville. All heavy 3 year olds. Two other varieties, both as well finished as above, all sizes, on page 10.

Moerheim Spruce

2 1/2-3 ft. **\$12.00** each rate

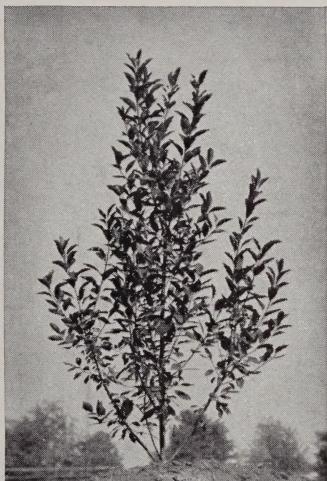

In our experience, not only does the Moerheim develop a stronger blue cast, but tends to fill out more compactly and symmetrically, and retain its lower branches. Entire lot is carefully matured with balanced branch structure to continue dense development. From grafts off specimens chosen for brilliancy of blue and compact growth habit. For other sizes, see listings on page 18. Four pages of Evergreens—starting on page 16.

Cotoneaster

2-3 ft. **70c** each rate

Acutifolia. Heavily branched specimens, very fully developed especially for Landscaper installation. Holds its leaves till well after killing frosts, preserving hedge and shrub plantings weeks later into the fall. Its glossy green leaves turn bright red and purple, fill with jet-black berries. 5 other varieties, many sizes, page 8.

Prunus Newport

4-5 ft. **\$1.40** each rate

Our Newport block is always one of the most interesting in the nursery. Purple leaf—purple bark—pink flower in the spring—purple fruits in the fall, they are a constant color parade. Newport has the darkest leaf and strongest color of all ornamental plums. Our specimens are correctly developed with long low side branches for greatest color mass. 12 other varieties, too, page 11.

Magnolia Soulangeana

3-4 ft. **\$10.00** each rate

This is the only photo in our catalog that is not of an actual Naperville plant. Because the flower, appearing in earliest spring, makes the Magnolia desirable, and we took our pictures in September, it was necessary to buy this standard photo. Our stock is 4 to 5 years old, lighter and more erect in habit. Have bloomed in the nursery row. 2 varieties, more sizes, page 23.

76 Years OF

... TELL THE FACTS OF WHY YOU SHOULD

We have been doing just a single thing—raising nursery stock—for so long, that we've been taking ourselves for granted! We even took our customers for granted—believed that they were pretty familiar with the reasons Naperville could give them good, satisfactory nursery stock.

But with the announcement in 1941 of our 75th Year Diamond Anniversary, so many of you stopped in to talk "old times" that we were surprised by all the important things we had come to consider commonplace. We owe you thanks for your interest, and the awareness you brought to us that our old-fashioned, unhurried methods are still the only way to produce **the best** nursery stock.

Naperville is a HARDY Nursery

Naperville stock will transplant more successfully to your customer's location—because it is grown in one of the severest winter-kill regions in the U. S.

Chicagoland always has 10 and 20 below zero weather every winter—anything that is going to winter-kill is killed in our nursery row. Here, too, we really have thaws—in January and February temperatures go up and down 35 degrees in a day or two, breeding-in a hardiness possible in few other places.

Transplants Only—at Naperville

We use no short-cut, quick-effect or so-called "just as good" methods at Naperville. Every item gets the kind of care it needs to insure best development.

No item is considered salable until it has been in the field 3 years. Every item in this catalog has been both root-pruned and transplanted at least once.

Heavier Tops—More Fibrous Roots

Naperville's transplanting program retards tap-rooting, promotes compact, fibrous root growth. Such stock is moved more successfully, without undue set back. This program also results in better matured, denser tops, that make substantial, finished specimens.

Usual "height" method of pricing gives only a partial idea of Naperville's values. That's why we state number of canes on many items, use photo's on some pages, to show you what to expect.

"Pedigree" Propagating

Naperville does not buy lining-out stock. We produce our own cuttings and seedlings. Large mother-blocks are maintained so that we control type, vigor, bloom, color, size, hardiness.

Our mother blocks are made up of individually selected, maturity-proved plants that have been chosen over years of culling. When improved items are developed elsewhere, we buy young plants, which must grow and bloom in our nursery before use as mother stock. This costlier program insures you of predictable satisfaction every time.

Fresh Dug for Your Order

Naperville does not dig in the fall and store "dormant" over winter. All items in this catalog are dug individually for each order. While this method costs us more, Naperville prices are no higher. We believe it gives you hardier stock, better livability.

1942 was a "Vintage Year"

Here at Naperville we had one of the best growing seasons in a decade. Our rainfall was one of the heaviest in the history of the weather bureau. In addition, temperatures were mild—spring opened up earlier and was warmer, while summer was cooler.

Everything in our nursery made heavier grades within sizes. Tops filled out more, were denser. Visit us this year, and see these heavier Naperville specimens.

NAPERVILLE NURSERY IS ILLINOIS'

Now in Full Use—300 Acres

"KNOW HOW"

BUY AT NAPERVILLE

Naperville Pioneered Soft-Wood Cuttings in America—In 1914 when imported soft-wood cuttings were stopped by the war, Naperville was already propagating its own soft-wood cuttings. Old timers remember Naperville as one of the few—and one of the largest—sources of these cuttings for many years. Naperville's experience in making soft-wood cuttings successfully is one of the longest in the country.

Von Oven Family in Control of Naperville Nurseries through its entire 76 years—the same family, the same principles, that built Naperville into Illinois largest nursery, is still directing it today.

18 Years is Average Service of ALL Naperville Employees—"know how" comes with experience. Today these people are richer in experience, in knowing what to do, when to do it, and how to do it, to raise the best stock.

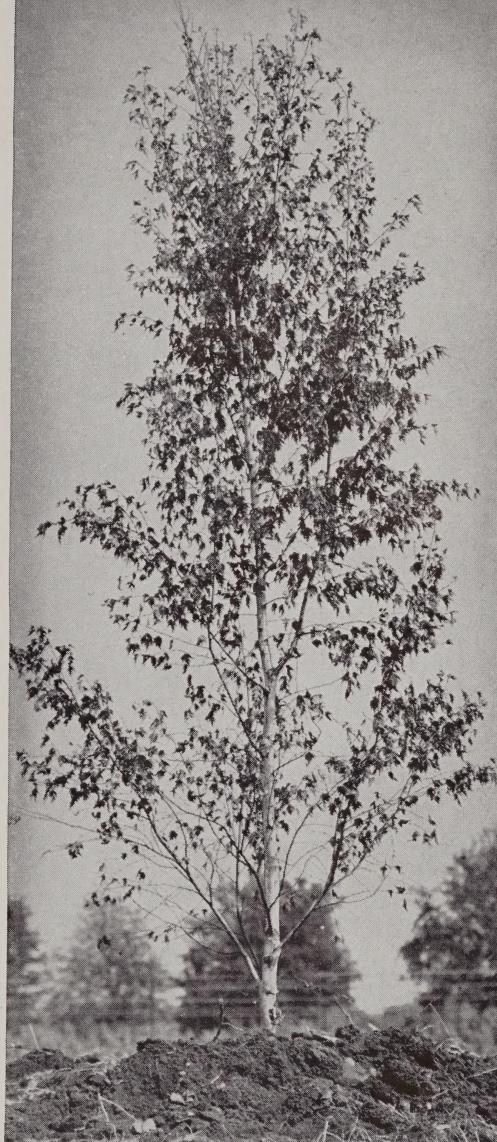

Controlled Quality Stock—All of Naperville's more than 300 acres is located in or on the edge of the town of Naperville. The entire operation is under the supervision of the same group of men and women. The same equipment, the same technique is used on every acre. We have no "branch" nurseries in other states. The result is consistently uniform, hardy stock.

Prompt Handling, Fast Shipment—

Naperville is just outside of Chicago. It enjoys the rail and truck facilities of the world's biggest transportation center. Your stock spends less time "in transit" when you order from Naperville.

Naperville is Exclusively a Nursery—no one at Naperville is connected with any other business, whether owner or employee. Our entire time is devoted to just one thing—raising good nursery stock. It is our business, our vocation—it gets our undivided energy.

LARGEST NURSERY All in Nursery Stock

Cutleaf Weeping Birch

8 to 10 ft. \$5.00 each rate

This is a reproduction of an actual, unretouched photograph, taken in our Nursery, to show you what to expect when you order a Naperville Cutleaf Weeping Birch. Here you can see the ideally proportioned main and secondary branch development so important to graceful, decorative maturity. With such stock you get a real "weeper", right from the nursery row—you deliver full satisfaction to your customer the day you install the tree.

This Birch has had ample room in the row for fullest top development—has been carefully cultivated to preserve all lower branches. Transplanting and root-pruning has increased the density of leaf and branch, in addition to stimulating more fibrous and compact root growth for successfully moving to your customers location. In a full range of sizes on page 20.

NAPERVILLE SHRUBS

Every One Completely Finished in Our

All Naperville Shrubs are grown expressly for Professional Landscaper use. We have no "light" grades. We offer only fully matured, heavy specimens, finished in the nursery, ready for final planting in the landscape location.

Naperville Shrubs are actually designed, by our growing methods, to give a permanently established appearance to the new landscaping installation. They are heavy enough for filling in or adding to old landscape plantings.

All Naperville Shrubs are proven thoroughly hardy. Over the past 3 years they have withstood temperature of 10 to 15 below zero a dozen times. They are sure to satisfy you.

Heavy Specimen Transplants

Nursery—Ready for Final Installation

Every Naperville Shrub is at least 3 years old before it is considered salable. In its first year in the nursery row, it is pruned to the ground to insure correct, stocky, well formed branch development. It is both transplanted and root-pruned at least once, to produce compact fibrous roots, essential to successful transplanting to your customers grounds.

Pedigree Propagating, from our own blooming mother blocks, produces a uniformity of vigor, bloom, color, size and hardiness that enables you to promise your customers the most in true-to-type characteristics. Naperville's prices for this stock are no higher—in most cases, in fact, are lower.

3-4 feet70	6.00	
bumalda Anthony Waterer	Anthony Waterer Spirea		
18-24 inch60	5.00	
froebelii	Froebel Spirea		
This block is so good we've featured it twice in this catalog—it's pictured on the front cover—described here as our customers saw it last summer! Entire block so uniform tops were almost level. Broad, well filled plants of 15 to 20 canes, all young live, vigorous wood. Flowered heavily last summer. Both transplanted and root-pruned. Way underpriced for such "finished" heavy specimens.			
2-3 feet50	4.00	
alba	White Froebel Spirea

2-3 feet40	3.00	
3-4 feet50	4.00	
4-5 feet60	5.00	
SYMPHORICARPOS chenaultii	Chenault Coralberry		
To recommend this variety: It does not sucker like ordinary Coralberry. Leaves are smaller, with somewhat serrated edge, making bush more decorative. Has smaller but brighter and more abundant berry—much showier. Canes are straight growing in habit, do not tangle like common coralberry.			
To recommend this block: Nicely developed heavy specimens, rounded shape, well filled. Average 10 to 15 canes.			
2-3 feet70	6.00	
3-4 feet80	7.00	
racemosus	Common Snowberry		
2-3 feet30	2.50

NAPERVILLE

"Heavy Specimen Development" is the object of Naperville's Evergreen program. Here in our 40 acre block of Evergreens you will find only the most popular varieties—only the most distinctive types—each one grown to fill the Landscapers requirement to fit a balanced planting plan. Every step in the growing of each Evergreen is designed to develop densely filled branches, uniform and symmetrical bodies, and compact true-to-type heavy finished specimens.

By "finished specimens" Naperville means ready for final installation on your customers grounds. Each Evergreen is matured into a heavy grade plant in the nursery row. When it leaves Naperville it is a generous grade by any standard.

A Typical Von Ehron Juniper

2 to 3 ft. **\$6.50** each rate

Choice heavy sizes. This picture demonstrates that it is an even better value than indicated by the price, with its dense branches, its filled centers. Really look immense. See listing below.

EVERGREENS

All Naperville Evergreens are Transplanted at least 3 times. In addition, we root-prune when growth appears too rapid. As a result, you will find in our fields only those dense, well filled tops that develop into symmetrical, compact maturity. At the same time, this repeated Transplanting and root-pruning insures the compact, fibrous root-growth essential to successful transplanting to your customers location.

Naperville also uses great care in skillful shearing and disbudding, to force even denser branching. The Scotch pine on the back cover is an excellent example of what our methods accomplish.

Regular and continuous dusting program protects Naperville Evergreens from insect pests throughout their growth.

Some "Finished" Irish Junipers

3 to 4 ft. \$5.00 each rate

Seven hibernica's show the uniformity of their "finish" in this field photo. Tapering top and base, rounded middle. Heavily and evenly filled from top to bottom. Other sizes below.

Naperville Grafted Junipers—Strongly Colored, Heavy Specimens

Blue, Golden, Silver or Green—you'll find Naperville Grafted Junipers unusually uniform in color. Not merely within the individual trees, but over the entire variety block. This is the result of testing and eliminating, for years, until today we buy grafts only from those few sources whose trees, on maturity in our nursery, have shown consistent and strict uniformity of color.

But Naperville Junipers offer you more than superior color. We deliberately make grades heavier and denser by expert top shearing and pruning. Usual "height" method of listing does not indicate the real size of these trees. Branches are much more numerous, foliage much heavier. All varieties below, plus Chinese Column Junipers on opposite page, are grafted. Ask to see them.

Naperville Shade and Flowering Trees

All shade and ornamental trees have been two and three times transplanted and have good smooth trunks, well formed heads and a splendid root system.

All trees are dug bare root unless marked B & B.

NAPERVILLE FIELD TRANSPLANTED ONE

Let us quote you on your list of wants. In large quantities we can make you better prices on many items we have in surplus.

We are frequently asked for general information in regard to proper planting times of perennials.

Perennials as a general rule, with the exception of those that love water, thrive best on good garden soil, well drained, and especially good surface drainage, so that no excessive moisture or water accumulates in beds in winter, which with changeable frost action is detrimental.

As a general rule, perennials are best moved during September, October and up to frozen ground time in the Fall, and then again in Spring, beginning with the time when the first shoots begin to show green on perennials; and from that time up into May until too much foliage and hot days terminate successful planting.

Iris of various sorts transplant particularly well shortly after blooming time, when they can be divided and pruned back for new plantings.

Peonies are best transplanted at any time during the Fall months, even up into cold weather; but if Spring planted, move them as early in Spring as possible.

Mulching perennial beds in colder climates should be done with material such as dry straw, hay, oak leaves, but never with leaves from soft wood trees, or fertilizer, or grass clippings, such as will pack down and not allow the air to reach plants. The latter environment generally creates a heating and rotting condition, and produces a loss whether in the first or in subsequent years after planting. Apply mulch only after frost has entered the ground to depth of several inches.

Perennials also like an occasional application of good garden fertilization if soil is sour, but apply with caution. If the ground is sour, apply limestone screenings (size one-eight inch to dust) liberally before applying fertilizer.

Varieties marked with a (★) are particularly adapted for the rock garden.

Varieties marked with a (●) are suitable for waterside planting and damp places.

Varieties marked with a (◆) are good ground covers.

ADVICE TO CORRESPONDENTS, DIRECTIONS TO CUSTOMERS
AND CONDITIONS OF SALE

All prices named herein are:

- a. Limited to 1942-43 and supersede those of any previous General Price List.
- b. For goods f. o. b. Nurseries or cars Naperville, Illinois, exclusive of any packing, express, freight or transportation charges; packing charges are extra in addition to cost of plants. No charge for packing car lot orders in bulk.
- c. Subject to cancellation or change without further notice upon prior sale or depletion of our stock of goods.

In the rush of planting seasons, customers calling at the nursery will be better waited upon and served by making an appointment in advance. It is difficult to always properly serve customers at the nursery on short notice, and especially on Saturdays.

Orders taken at our Sales Room on Sunday. No stock dug on Sunday.

OUR NURSERIES are situated adjacent to the city of Naperville, DuPage County, Illinois, some 28 miles West of Chicago, on the Chicago, Burlington & Quincy Railroad. Popular automobile routes as State Route No. 65, and U.S. Highway No. 34 pass our Nurseries.

ORDERS. Write plainly and give explicit directions as to address and mode of shipment, whether by freight, express, etc.

Orders are accepted and all shipments made subject to delays or inability to ship or deliver by reason or on account of strikes, accidents, droughts, fire, floods, frost, hail, sleet, war conditions and orders, railroad or express embargoes, priority or other transportation orders, prior sale of stock, stock shortage, labor or car shortage, or any other cause or causes for delay in shipment or delivery of goods which are beyond our control.

Due to general conditions of weather, possible labor shortage and other contingencies, during the digging and shipping season, we do not guarantee to fill all items of an order or orders placed with us in one or first shipment.

GUARANTEE AND CLAIMS. In growing and furnishing all Nursery stock, we exercise the utmost diligence and care to have it true to name and will, on proper proof, within one year from date to our satisfaction, replace in ordered sizes any that will prove otherwise or refund the amount paid. Any and all sales made by us do not include any warranty expressed, or implied, as to quality, description, productiveness, growth, or any other matter or qualifications pertaining to the Nursery stock sold.

It is mutually agreed and understood between the Purchaser and Ourselves, that in any case we shall not be liable for a sum greater than the amount originally paid us for any tree or plants, etc., that prove untrue.

IN MAKING ALL SHIPMENTS WE CAREFULLY CONSIDER CONDITIONS IN GENERAL AND ACT ACCORDINGLY.

ALL SHIPMENTS AT PURCHASER'S RISK.

In absence of specific instructions, we are to route all shipments according to our best judgment without assuming responsibility.

If destination is a Pre-Paid Station, freight charges will be prepaid by us and charged for on invoice.

Claims for Errors or Shortage must be filed with us within Ten (10) days after receipt of goods. No claims for errors or shortage in excess of purchase price will be considered. Claims for damage to stock en route by Railroad or Express Company shall be immediately reported and entered with your local agent of transportation company.

Payments of accounts to be as follows:

Remittances with order will be considered payment on account, inasmuch as chargeable packing charges, or prepaid express or freight, or cost of trucking cannot be ascertained until goods are packed, shipped or delivered, as the case may be.

All Accounts, 30 days net cash.

2% Discount allowed on accounts if paid within 10 days from date of shipment.

3% Discount allowed if remittance accompanies order.

Where remittance accompanies order same should cover total amount computed at list prices of goods ordered without deducting discount.

Such remittances will be considered payment on account, **subject to cash discount.** Our invoices will show entire transaction showing price of plants, packing charges, prepaid express or freight, or delivery charges, **also discount for cash with order will be applied on invoice** as soon as goods are shipped, or delivered, as the case may be.

The condition may arise where the entire amount of all invoices for stock shipped will be less than the amount, or amounts remitted, in which case the **unearned portion of remittances will be refunded as soon as the shipping season is over and our books and accounts have been properly audited, if not before.**

Payments for partial shipments shall be due on basis of Invoice dating.

Accounts after due dates are subject to sight draft, also interest charge at rate of 6% per annum.

All will be shown on invoices, and in case of over-payment by remittance for goods actually sent proper refund will be made of unearned portion of remittance, as soon as our shipping season is over and books and accounts have been properly audited, if not before.

Cash or satisfactory references with order, if purchaser has no credit established with us.

Certificate of inspection will be furnished with each shipment.

Address all communications, orders and remittances to:

NAPERVILLE NURSERIES, Naperville, DuPage County, Illinois.

STATE OF ILLINOIS
Dwight H. Greene, Governor

DEPARTMENT OF AGRICULTURE
DIVISION OF PLANT INDUSTRY
Glen Ellyn, Illinois

NURSERYMAN'S CERTIFICATE NO. 276

THIS IS TO CERTIFY THAT the nursery consisting of General Nursery Stock and field grown Herbaceous Perennials (field inspected) and the premises of NAPERVILLE NURSERIES, INC., Naperville, Illinois, situated at Naperville, Illinois, have been inspected by a duly appointed inspector of this office and that said nursery and premises are apparently free from dangerous insect pests and plant diseases.

This certificate is valid until August 1, 1943 unless sooner revoked.

August 4, 1942

C. H. KELTNER,
Superintendent

H. F. SEIFERT,
Chief Plant Inspector

Quantity Rates will Be Applied as Follows.

1 to 4 plants inclusive of any one item will be billed at the single rate.

5 to 24 plants inclusive of any one item will be billed at the ten rate.

25 and up of any one item will be billed at the hundred rate.

Whenever we are asked by customers to make special selections of items for them we add 15% to catalog prices for items selected.

All nursery stock selected or tagged by customers in the nursery will be charged for according to the value of the plants chosen, usually catalog prices plus 25%.

SCHEDULE OF BAILING AND BURLAPING CHARGES

When balls of earth (B & B) are required or desired on shrubs, trees or plants not catalogued as balled (B & B) add the following charges per piece. Sizes are diameter and depth.

12" x 12".....	\$.35	36" x 22".....	\$5.00
15" x 15".....	.60	40" x 24".....	7.50
18" x 15".....	1.00	44" x 24".....	8.75
20" x 15".....	1.50	48" x 30".....	10.00
22" x 16".....	2.00	54" x 32".....	12.50
24" x 18".....	2.50	60" x 34".....	18.00
28" x 20".....	3.00	72" x 36".....	25.00
30" x 20".....	3.75	84" x 40".....	32.50

SCHEDULE OF BOXING CHARGES

12" x 12" x 4'.....	\$1.50	24" x 24" x 6'.....	\$4.00
12" x 12" x 6'.....	2.00	24" x 24" x 8'.....	4.50
18" x 18" x 4'.....	2.50	24" x 24" x 10'.....	5.00
18" x 18" x 6'.....	2.75	24" x 24" x 12'.....	5.50
20" x 20" x 5'.....	3.00	30" x 30" x 8'.....	5.50
20" x 20" x 6'.....	3.25	30" x 30" x 10'.....	6.00
20" x 20" x 8'.....	4.00	30" x 30" x 12'.....	7.00

Other sizes at proportionate cost.

Bales at cost from \$.50 to \$3.00 each.

On items in large quantities write us for special prices

Juniper Virginiana

2-3 ft. \$4.00 each

Look down the row in this picture—see lots of reasons why we can satisfy your most critical demands. This slim, dense, uniform, 2-3 ft. specimen is typical run-of-the-row, not a "special" singled out to have its picture taken. Priced B&B, see page 16.

American Arborvitae

3-4 ft. \$5.00 each

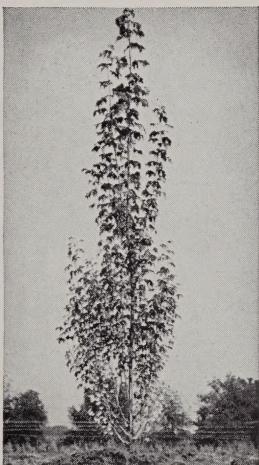

Pyramidalis. Recommended by their uniform shape. Solidly filled out with vigorous young growth. Single leader produces sharply pointed top over wide and balanced body that hugs the ground at its base. Priced B&B. 6 other varieties, all sizes, page 19.

American Linden

8-10 ft. \$2.50 each

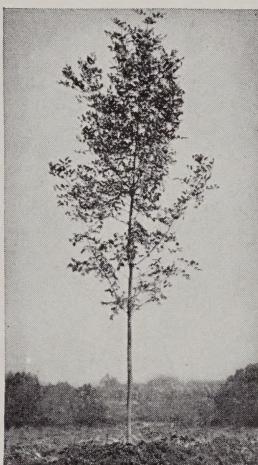

This untouched photo, printed just the way the camera took it, shows everything you need to know about Naperville's Lindens. Good straight trunk, fully rounded head, branched nicely. Typical of our entire lot, including the biggest sizes. See page 27.

Bolleana Poplar

10-12 ft. \$3.00 each

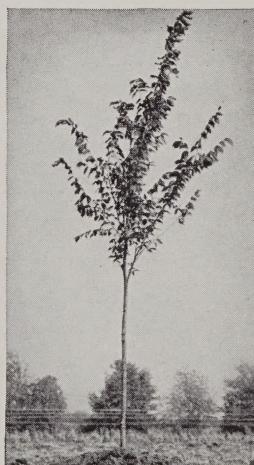

Vigorously developed branching right from the ground up, gives this block a full bodied tapering silhouette. These true-to-type tops are extremely well proportioned for symmetrical maturity. Best of the pyramidal poplars because of its greater strength and longer life, Bolleana holds its leaves longer. Page 25.

Green Ash

8-10 ft. \$1.50 each

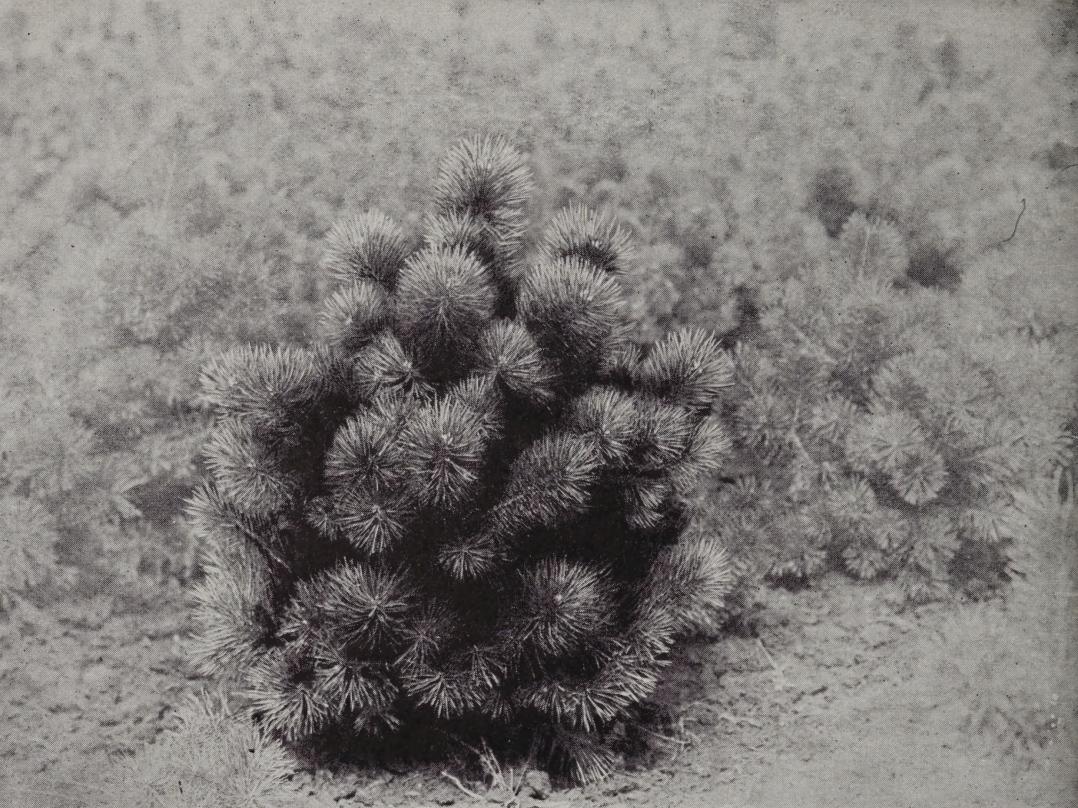

We've started these Ash on their way to finish into fine shaped trees. Ample room in the row, correct transplanting to wider spacing, has developed nicely rounded heads, produced an excellent branch structure. Like all Naperville trees, additional root-pruning has produced fibrous roots. Page 22.

American Elm

8-10 ft. \$1.80 each

In excellent finish and big quantity, our entire size range of Elms make the prices look too low. Special care in growing, transplanting, has produced a sturdy structure for perfect mature branching. Let us bid on big quantities. Page 27.

SCOTCH PINE—a typical Naperville specimen 3 to 4 feet **\$6.00** each rate

Here's a perfect picture of a 3 to 4 foot Scotch Pine. We can duplicate it several hundred times in the Naperville blocks. Stocky, dense, compact, symmetrical—no pine is more arresting. A virtual ball of needles, every branch so filled that the tree looks like a cluster of green spools. Three transplantings, plus special top shearing and disbudding, produces this extra-desirable result. Above is an actual photo, taken at random in our fields, Sept. 12, 1942. It is an excellent example of Naperville's heavier grades. Price includes B&B. For other sizes, see page 19.

Pfitzer Juniper 18-24 in. **\$4.50** each

Definitely heavy grade, this photo of an average-of-the-row 18 to 24 in. size. Our 1943 "order starter"—the finest lot of Pfitzer's we've ever had—with last year's prices cut 10% to make you order. Heavily branched, densely filled, really generous grade. Price includes B&B see page 16 for all sizes.

Savin Juniper 18-24 in. **\$4.00** each

Naperville can give you better-than-average grades this year, at prices that make them far better-than-average values! That's why we had a photographer come into our fields and take these pictures, to show you the proof. Hundreds more like this uniform, Savin. Price includes B&B, see page 16.
